Educational psychology is devoted to the study of how people learn including differences in learning, gifted learners, and learning disabilities. This branch of psychology involves not just the learning process of early childhood and adolescence but includes the social, emotional, and cognitive processes that are involved in learning throughout the entire lifespan. The field of educational psychology incorporates a number of other disciplines, including developmental psychology, behavioral psychology, and cognitive psychology. Topics of Interest Within Educational Psychology. In today's complex educational system, educational psychologists work with educators, administrators, teachers, and students to learn more about how to help p Educational Psychology book. Start by marking "Educational Psychology: Developing Learners" as Want to Read: Want to Read saving… Want to Read. Currently Reading. Read. Other editions. Enlarge cover. Educational psychology is the study of how humans learn in educational settings, the effectiveness of educational interventions, the psychology of teaching, and the social psychology of schools as organizations. Knowing your learning style and the various theories can help you better understand information, which will help you develop positive study habits. Several learning theories such as behaviorism, cognitivism, and constructivism exist to explain the ways in which a person can learn and understand various concepts. Visual learners will highlight important passages in books or draw pictures/diagrams of ideas to help better understand the concepts.
Theory of Learning # 1. Watson’s Behaviourism in Learning Theory: Early in the twentieth century objective behaviourism became the main feature in American psychology and came more and more in conflict with the German tradition. Pressure increased to break the traditional mould and to develop a psychology that was directly oriented towards objective behaviour and practical usefulness. John Broadus Watson (1878-1958): It was through his vigorous attacks on traditional psychology and his attempt to build a radically different system that a new stance in psychology appeared in the American psycho... Educational Psychology: Developing Learners, Student Value Edition (7th Edition). Jeanne Ellis Ormrod. 5.0 out of 5 stars 1.Â She was Professor of Educational Psychology at the University of Northern Colorado until 1998, when she moved east to return to her native New England. She is currently affiliated with the University of New Hampshire, where she occasionally teaches courses in educational psychology and research methods.
Educational Psychology: Developing Learners.

Jeanne Ellis Ormrod

5 Extrinsic vs. Intrinsic Motivation

Motivation promoted by factors not within individuals
Academic activities are a means to an end.

Intrinsic Motivation promoted by an internal desire to do something
The academic activity is the end.

Intrinsic motivation tends to lead to greater performance and longer-lasting motivation.
