An Illustrated History Of 18 Inch Gauge Steam Railways

Mark Smithers

Noiseless motors and steam-cars for city railways. Burnham, parry, williams & go., Baldwin locomotive works. In the following pages we present and illustrate a system of NARROWGAUGE LOCOMOTIVES, in which, it is believed, will be found designs suited to all the requirements of ordinary service. These patterns admit of modifications, to suit the preferences of railroad managers, and where machines of peculiar construction for special service are required, we are prepared to make and submit designs, or to build to specifications furnished.
